Welcome

This catalogue is designed to give you an overview of the hardware and related services offered by Whitespace Work Software.

Please note that we are only able to include a sample of all the products that we offer. In case you can't find the product that you're looking for, please contact us with your requirements and we will check if we or one of our trusted partners can help you.
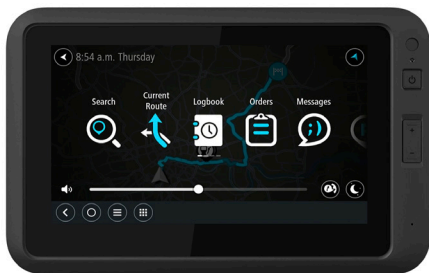

Hardware catalogue
Fleet devices

PRO 5350

- Combines navigation and fleet management / tracking
- Portable tracking device, can be moved from vehicle to vehicle
- No fixed installation required for tracking
- Privacy controls allow drivers to switch off vehicle tracking when off duty

PRO 8375

- Best-in-class navigation and traffic
- 7" screen and ruggedised design optimised for both in-vehicle and outdoor usage
- Support drivers to be safer and more efficient
- Boost productivity and customer service
- Customise the device to suit your business needs

PRO 2020

- Extend to all of your fleet with this compact but powerful Driver Terminal
- RFID Driver Identification (with buzzer)
- Log working time of any employee: clock in and out
- Log trips as business / private / commute status
- Continuous OptiDrive 360 driving style feedback

Tablet holders

Tab-Tite™ holder for 7" tablets with thick skins, sleeves or cases

- For 7 inch tablets

- Support cups contain open slots to accommodate for devices of various sizes, including tablets in protective sleeves

- Spring loaded tension provides secure support for your tablet

- Full access to all ports

Tab-Lock™ holder for 7" tablets with thick skins, sleeves or cases

- Support cups contain open slots to accommodate for tablets of varying sizes

- Spring loaded for ease of removal and insertion of your tablet

- Full access to all ports

- Customize height of holder for your tablet

Vehicle dock with GDS™ technology

Vehicle dock with GDS™ Technology is a spring loaded, quick release holder that offers a secure fit with easy access to the mounted tablet. This docking station is compatible with the Apple iPad Mini 2 / 3 with sleeve.

The integrated GDS™ Technology platform enables data and charging capabilities to the mounted tablet. Without the need to remove the IntelliSkin from the device, the user can quickly and efficiently mount the device in the vehicle dock and keep the device charged.

Hardware catalogue
Tablet holders

Universal holder for 12" tablets

Simple to open and close, the spring loaded RAM X-Grip® leaves the outside edge of your tablet almost completely free of annoying obstructions. Soft rubber fingers apply just enough force to keep your tablet in safe and secure.

Protective sleeves

Intelliskin™ with GDS™ technology

The IntelliSkin™ is a protective sleeve featuring GDS™ Technology.

- Offers drop protection and shelters your device from scratches and debris

- Prevents damage due to repetitive plugging and unplugging

- Compatible with all GDS™ docking stations

- Handstand and shoulder strap compatible

Griffin survivor

Designed and built to meet or exceed US Department of Defense Standard 810G, Griffin's Survivor extreme-duty case is built from the inside out to protect your Galaxy Tab from extreme conditions; dust, sand, rain, shock, vibration and a host of other environmental factors. Survivor is built on a shatter-resistant polycarbonate frame clad in rugged, shock-absorbing silicone. A built-in screen protector seals your touchscreen from the outside environment.

Otterbox

Defender Series covers your entire iPad with three layers of rugged protection. And, it includes a shield stand for added screen protection and hands-free iPad use everywhere.

Hardware catalogue
Mounts and holders

Double 1.5" ball short socket arm

This short double socket arm has a socket at both ends that accommodates 1.5" ball bases. Loosening the knob opens the end sockets, allowing you to pivot the ball and socket connection. This socket technology allows for almost infinite adjustment and perfect viewing angles.

Dimensions:

- Overall Length: 3.5"
- Socket-To-Socket Length: 2.25"
- Material: Powder Coated Marine Grade, Aluminium

Double socket arm for 1" ball

This double socket arm has a socket at both ends that accommodates 1" ball bases. A single spring inside the arm opens the end sockets, allowing you to pivot the ball and socket connection. This socket technology allows for almost infinite adjustment and perfect viewing angles.

Dimensions:

- Overall Length: 3.69"
- Socket-To-Socket Length: 3"
- Material: Powder Coated Marine Grade, Aluminium

Long double socket arm for 1" ball

This long double socket arm, has a socket at both ends that accommodates 1" ball bases. A single spring inside the arm opens the end sockets, allowing you to pivot the ball and socket connection. This socket technology allows for almost infinite adjustment and perfect viewing angles.

Dimensions:

- Overall Length: 6"
- Socket-To-Socket Length: 5.1875"
- Material: Powder Coated Marine Grade, Aluminium
- Ball Size: 1" Rubber Ball "B" Size

Heavy duty suction cup base with 1" ball

The heavy duty suction cup consists of a 3.25" suction cup base with diamond adapter and 1" rubber ball. It is compatible with all 1" "B" size double socket arms. The suction cup is designed to have an extra strong hold on any smooth non-porous surface, but for best result, mount the suction cup on a glass or nonporous plastic surface. Suitable for 7-10" tablets in low vibration environments.

1" ball on various shaped bases

1" diameter rubber ball connected to various shaped bases. The base has pre-drilled holes making the universal AMPs hole pattern. Powder Coated Marine Grade, Aluminium Ball Size: 1" Rubber Ball "B" Size

Double 1" ball adapter

The double ball joiner, consists of a 1" rubber ball on both ends that allow the connection of two 1" socket arms. When measured from ball centre to ball centre the arm length is 1.75". This part is ideal if your mount arm is just too short for the application or if you need an extra joint to achieve a right angle.

Hardware catalogue
Window mounts

Twist lock suction mount with round plate (AMPS hole pattern)

The twist lock suction cup mount consists of a 3.25" suction cup locking base with a 1" ball attached, a double socket arm and a round plate with drilled hoes including the universal AMPS hole pattern. Its design dampens shock and vibration helping to extend the life of mobile electronic devices while the rubber ball and socket technology allows for almost infinite adjustment.

Material: Powder Coated Marine Grade Aluminium and high strength composites Ball Size: 1" Rubber Ball "B" Size

Twist lock suction mount with AMPS base

A twist lock suction mount for the Garmin Aera or the TomTom Rider 2 motorcycle Sat Nav unit. Also any other units that can use an AMPS base plate.

Ball Size: 1" Rubber "B" Ball Size

Colour: Black

Material: Powder Coated Marine Grade Aluminium and High Strength Composite

Twist Lock suction mount with 1" ball arm and diamond adapter

The twist lock suction cup mount consists of a 3.25" suction cup locking base and diamond plate end. The mount is designed with a 1" diameter patented rubber ball and socket system that has an adjustment point at the holder and base. Simply attach the suction cup base to the windshield of your vehicle for an easy and safe way to view your handheld device in your vehicle. Rubber ball and socket technology allows for almost infinite adjustment and perfect viewing angles.

Ball Size: 1" Rubber Ball "B" Size

Material: Powder Coated Marine Grade Aluminium and High Strength Composite

Services

Webfleet

Webfleet is an award winning fleet management solution that provides realtime information about the location of your vehicles, lets you communicate directly with your drivers, helps to improve driving behaviour, save on fuel and connects to a whole ecosystem of 3rd party solutions.

Masternaut

Masternaut Connect is the 4th-generation fleet management SaaS application on desktop and smartphone. It turns thousands of data points per second into insights for operations and fleet managers as well as HR professionals.

Training

We provide indepth training for TomTom Webfleet or Masternaut Connect Telematics systems.

Tracking installation

Installation of Tracking equipment dependant on vehicle make, model.

Device installation

Installation of Navigation / Mobile devices – both hard-wired or temporary installations.

De-installs and re-installs

If you need to remove, upgrade or simply replace hardware, we can remove it and / or reinstall into new vehicles keeping your fleet up to date.

Repairs

Ongoing repairs both remote and on-site on Whitespace Work Software installed devices.

Additional services

Some vehicles may allow additional services such as vehicle idling and PTO connection to be linked with the Telematics system. PTO connections could be brushes on sweepers, trailer connections and other additional options.

Fleet management

FMS connections may be possible based on vehicle make and model. By having these connected to a telematics system you can use fuel and mileage information to save money and increase fuel economy and efficiency.

Services

Tachograph

If your vehicle has a Tachograph unit installed then we should be able to connect it to a Telematics system to gain access to remote digital downloads and driver feedback.

Support guides

We will provide a generic guide but should you want a custom User, Support guide on how to update or use and setup your mobile devices then we can make these for you to distribute to your staff.

Analytics

Our Flexible Business Intelligence solution allows you to search, consolidate and analyse your waste and environmental data..

Consultancy

Fleet Consultancy to help you boost your fleet management efficiency.

Data training

Data Template Training.
