

Whitespace Environmental

Overview

What is it?

Whitespace Environmental is a job management system designed to help local authorities and contractors across the UK.

It provides all the features needed to manage environmental tasks like ground maintenance, public bin collection, fly tipping and graffiti removal.

How does it work?

Whitespace Environmental can integrate into most existing CRM systems and your Local Land and Property Gazetteer (LLPG), and information about land ownership and facilities added using GIS mapping.

Scheduled rounds are set up and automatically sent to your teams every morning and ad hoc requests can be sent immediately through out the day. Jobs can be updated using the vehicles' in-cab devices as the team progresses through the tasks and the customer service team will see the information update in real-time.

The powerful reporting tool allows in-depth reporting on your jobs effortlessly, helping inform strategic decisions.

Features

- Integrates into your CRM software and LLPG.
- Map data of the local area like land ownership and facilities.
- Real-time communication between all your teams.
- Jobs automatically scheduled and sent at the start of the day.
- Instantly update jobs and send ad hoc requests to teams.
- Save photos and videos as evidence of work completed.
- Automatic route optimisation.

Key benefits
