EXPERTS IN DELIVERING HIGH QUALITY TELEMATICS SOLUTIONS FOR THE PUBLIC SECTOR

Whitespace Work Software is the leading provider of waste management and telematics solutions in the UK.

We have equipped the fleets of over 100 local authorities with tracking technology, in-cab working solutions and job management systems.

- ✓ All Whitespace technology is developed and securely hosted in the UK
- ✓ We have an outstanding support team ready to assist with any issues
- ✓ Our dedicated client managers are able to help with on-going service management

Our mission

We want to grow faster than industry average through exceptional people delivering fantastic products & services.

WHY DO YOU NEED TELEMATICS?

HELPING OVER 100 LOCAL AUTHORITIES TO TRACK THEIR VEHICLES AND MONITOR THE PERFORMANCE OF THEIR FLEETS

Telematics has come a long way since its beginnings as a simple tracking tool, and now offers local authorities a range of benefits in terms of cost saving, fleet management support and meeting compliance obligations.

Our extensive portfolio of telematics products helps you to take control over your fleet and unlock productivity.

LOCATION TRACKING WITH REAL-TIME ALERTS

Tracking driver location not only enables fleet or logistics managers to plan resource more efficiently and minimise downtime, but also protects drivers.

REDUCE FUEL COSTS

A key cost saver. Many local authorities report lower fuels costs as a result of changes in Driver Behaviour, which leads to more efficient driving and better MPG.

REDUCTION IN MAINTENANCE COSTS

Vehicle breakdown for a council can cost hundreds of pounds in lost time and productivity.

REDUCTION IN ACCIDENTS AND FALSE CLAIMS

Our customers report experiencing fewer accidents since installing telematics, due to improved driver behaviour.

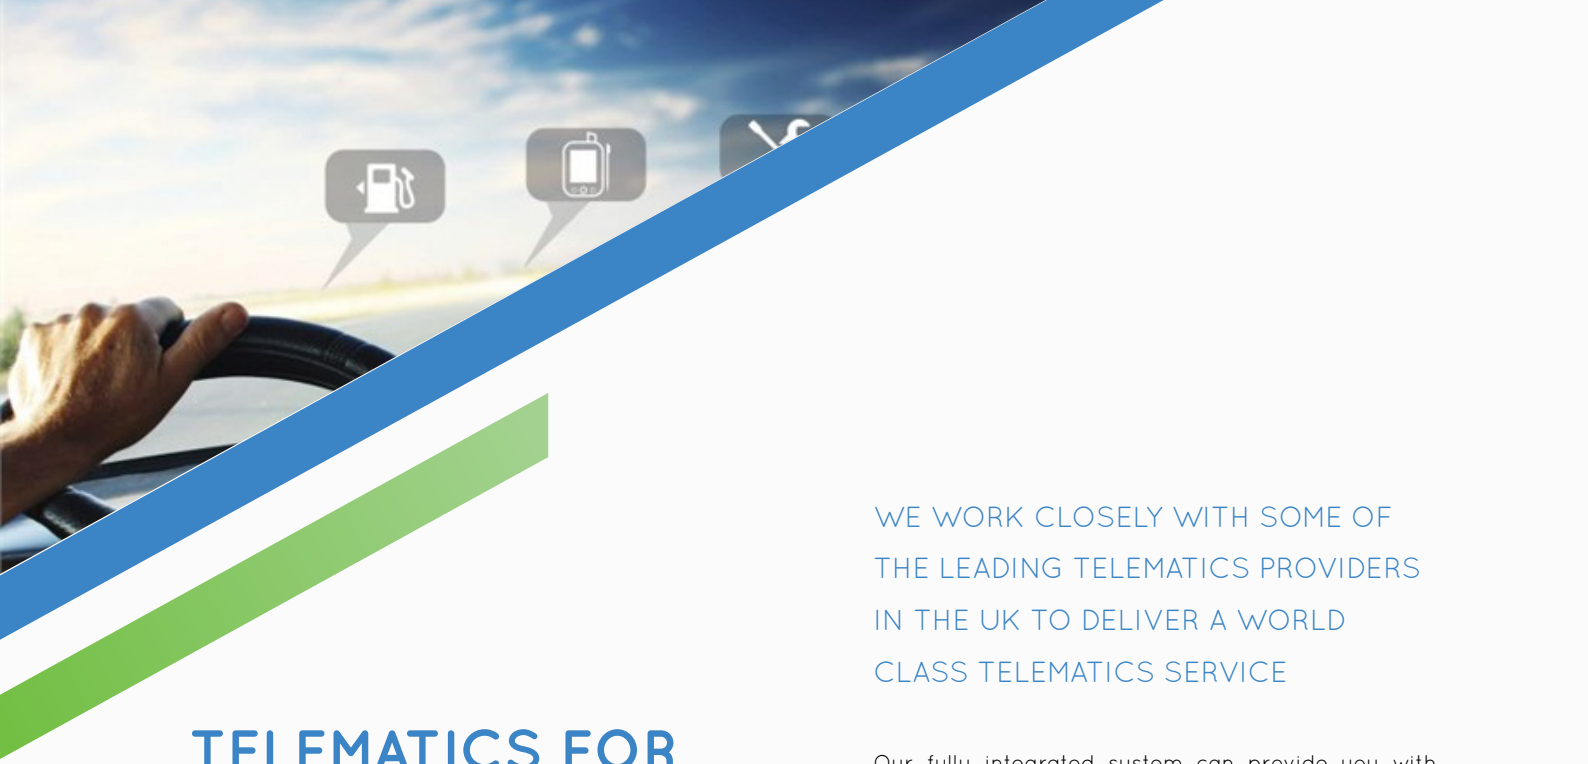

REDUCTION IN SPEEDING

Speeding is major cause of accidents, which can be addressed by telematics as it encourages better driving behaviour.

REDUCTION IN OVERTIME CLAIMS

Due to the 24/7 location tracking, fleet managers are able to monitor vehicle movements and download journey information, giving a full and accurate picture of all activity.

WE WORK CLOSELY WITH SOME OF THE LEADING TELEMATICS PROVIDERS IN THE UK TO DELIVER A WORLD CLASS TELEMATICS SERVICE

TELEMATICS FOR FLEETS OF ANY SIZE

Our fully integrated system can provide you with vehicle information such as tracking, driving behaviour, idling time, tachograph, ETAs and more.

Through our off the shelf integration we are also able to supply real-time data on round progress, instruction progress and any exceptions recorded, enabling a quick response to customer enquiries.

MAP VIEW

Know where your vehicles are and where they have been. Observe traffic information and get a more detailed view on what's happening on the roads.

REPORTING

Instant access to information. Spot trends over time and make smarter and more informed decisions.

DASHBOARD

Receive an overview of your fleet's performance at a glance. Track KPIs of vehicles, individuals, benchmark teams or get a simple overview.

ROUTE PLANNING

Send planned routes directly to your drivers that include traffic, customisable waypoints and a choice of alternative routes.

WHO'S BEEN THERE

See the vehicles and drivers which have been at a selected location during a specified time period.

DRIVING BEHAVIOUR

Monitor events such as harsh braking, speeding, harsh cornering and more. Use the information to build a score for each of your drivers and monitor their performance.
