TRANSFORMING LOCAL GOVERNMENT SERVICES

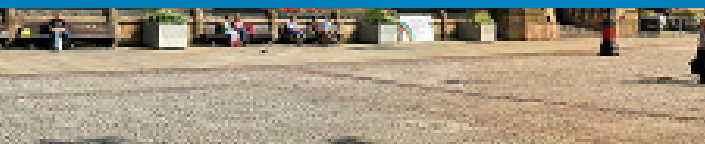

Whitespace Work Software is the leading provider of waste management solutions in the UK.

Since 2005, we have been at the forefront of innovation and transforming services for local government. Our products are used by over 100 local authorities and public-sector contractors to manage their services more effectively.

- ✓ All our technology is developed and securely hosted in the UK
- ✓ We have an outstanding support team ready to assist with any issues
- ✓ Our dedicated client managers are able to help with on-going service management

Our mission

We want to grow faster than industry average through exceptional people delivering fantastic products & services which unlock real efficiency improvements for the UK public sector.

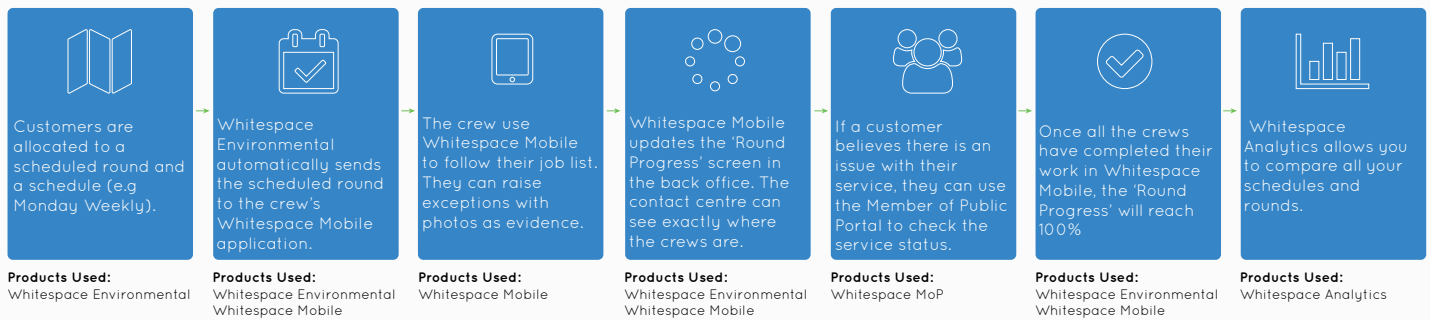

WHITESPACE CARETAKING

WHAT IS IT AND HOW DOES IT WORK?

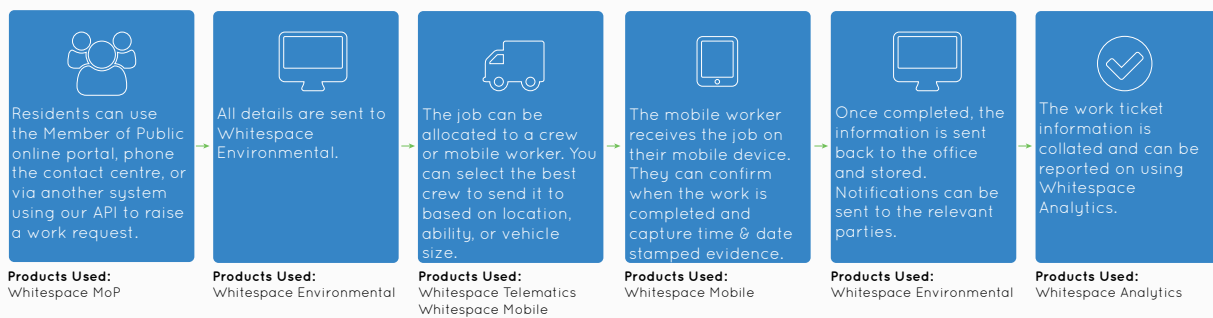

Whitespace Caretaking has been designed to meet the requirements of Local Authorities throughout the UK. It provides a range of features to simplify the management of Caretaking services and improves information capture to drive efficiencies across the board.

Whitespace Caretaking includes the latest work management technology to streamline the everyday services the council provides to the housing department and its customers. It can handle both scheduled work and reactive requests. The system can be re-configured in the future and additional services can be added if required.

Caretaking Scheduled Work

Caretaking Unscheduled Work

A SELECTION OF OUR CUSTOMERS

CARETAKING SERVICES

ONE SET OF SOLUTIONS FIT FOR ALL YOUR PROCESSES

Our system has been trusted by 100+ local authorities and public-sector contractors to service over 100,000 businesses across the UK.

Whitespace Caretaking is a set of solutions that can help you streamline all the services below and deliver more value to your customers.

HEALTH AND SAFETY CHECKS

Carry out health and safety checks on your mobile device. Send the information to the office instantly, access historic data and set reminders effortlessly.

GRAFFITI REMOVAL

Use your mobile device to capture photographic evidence of the graffiti, complete a report and automatically include the location.

BULKY WASTE REMOVAL

Generates and manages bulky waste requests.

ANTI-SOCIAL BEHAVIOUR REPORTING

The system is able to record anti-social behaviours and mobile workers can use their device to capture evidence when at the scene.

REPAIRS

The system can handle both scheduled repairs and reactive service requests.

REPORTS

The captured information can be used on Whitespace Analytics to run reports on KPIs, repeat offenders and more.
