Whitespace Mobile
Overview

What is it?

Whitespace Mobile gives you the tools to build engaging digital forms and allows data to flow between your teams in real time.

Its broad range of features include scheduling daily jobs, automated workflows issuing ad hoc requests, all having been designed to streamline your operations.

How does it work?

Build forms using Whitespace Mobile's powerful interface, customising them specifically to meet your requirements. Interactive input fields like drop down lists and check boxes can make capturing data easier, and applying validation rules ensures its always complete.

Whitespace Mobile can be integrated into your existing software through an API, giving your back office team access to information immediately after a form is submitted. Rules can also be set up to trigger automated actions, like sending reports to managers, reducing administrative time and effort.

Features

- Build fully customised forms.

- Real-time communication between all teams.

- Jobs automatically scheduled and sent at the start of the day.

- Instantly update jobs and send ad hoc requests to teams.

- Capture evidence of completed work with photos and videos.

- Automatically time/date stamps evidence, and saves location.

- Workflows reduce administrative time.

Key benefits

| Greatly improves customer service | Reduces paper work | Reduces fuel costs | Automates admin tasks | Collates accurate information | Indepth analysis and reporting |
